AGRICULTURE

Transforming Knowledge and Ways of Knowing for Food Sovereignty

Michel Pimbert

In the face of the organised power of science, business and mainstream politics, the more diffuse but networked power of the growing food sovereignty movement is confronted with many challenges. In this book, the author focuses on only one of these: the need to transform knowledge and ways of knowing to regenerate locally controlled food systems.

2007, 30pp, ISBN 978-1-84369-655-1, US\$18.00/£10.00

POLICY

Making aid work better for participants and improving national planning processes for sustainable development in the bargain

Sustainable Development Opinion

Tighe Geoghegan

Aid is one of the means nations have employed to achieve a vision of global prosperity: by supporting the development of weaker nations, it aims to increase security, well-being, and economic opportunity for all. Since aid emerged as an international institution following World War II, its role has steadily increased. The opinion piece reviews the Paris Declaration's principles and provides case studies from Tanzania and Vietnam who have successfully introduced structures and mechanisms to help them set their own directions with less donor interference.

URBAN

Scaling Urban Environmental Challenges: from local to global and back

Peter J. Marcotullio, Gordon McGranahan (editors)

'Think globally, act locally' emphasizes the importance of scale in dealing with environmental challenges, but not how to factor it in. This major new book focuses on the spatial dimensions of urban environmental burdens, showing how important it is to take these into account when pursuing environmental justice and good governance –whether in the context of the sanitary risks of slum living, the pollution of uncontrolled industrialization and motorization, or the enormous ecological footprints of affluent urban lifestyles.

2007, ISBN 978-1-84407-323-8, 399pp, £22.95

To Purchase: <http://www.earthscan.co.uk>

IIED aims to provide expertise and leadership in researching and achieving sustainable development at local, national, regional and global levels. In alliance with others we seek to help shape a future that ends global poverty and delivers and sustains efficient and equitable management of the world's natural resources.
