**2. What Are We Learning from Experiences with Markets
for Environmental Services in Costa Rica? A review
and critique of the literature.**

Manrique Rojas and Bruce Aylward
ISBN 1 84369 455 7, \$22.50/£15.00 (free to non-OECD),
65pp

By means of a case study of the Virilla watershed in Costa Rica, this report uses the Sustainable Livelihoods Framework to analyse the social effects of the Payments for Environmental Services (PES) programme, and examines the effects the programme has had on financial, human, social, physical and environmental capital.

**3. Governance and Land Relations. A Review of
Decentralization of Land Administration and Management
in Africa.**

Liz Alden Wily
ISBN 1 84369 496 4,
\$19.00/£12.50 (free to non-OECD), 90pp

Are rural Africans gaining more control over how their land relations and their land use decisions are decided? Is their access and input to institutions that manage and regulate these matters improving?

These are the kind of questions that this review of decentralising administration and management in sub-Saharan Africa seeks to answer.

5. Developing Pro-Poor Markets for Environmental Services in the Philippines

Markets for Environmental Services 3

Rina Maria P. Rosales

ISBN 1 84369 456 5,

\$22.50/£15.00,

(free to non-OECD), 90pp

This study reviews the various efforts made in the Philippines to develop markets for different types of environmental service, and also discusses the institutional support mechanisms that have emerged.

6. Making Land Rights More Secure: Proceedings of an international workshop. Ouagadougou, March 19th-21st, 2002.

GRAF, GRET and IIED (Eds.)

ISBN 1 84369 261 9, \$25.00/£16.00, 171pp

This international workshop brought together some 80 West Africans to consider the results of recent research and practical experience in the area of land tenure security. Researchers, decision-makers, leaders of farmers' organisations and elected councillors discussed tenure security and debated new approaches that might improve the situation for rural producers.

**7. Community Integrated Pest Management in Indonesia:
Institutionalising participation and people centred approaches.**

Institutionalising Participation Series 5

Mansour Fakih, Toto Rahardjo and Michel Pimbert

ISBN 1 84369 485 9,

\$36/£20.00 (\$14/£8 to non-OECD), 162pp

Integrated pest management (IPM) emerged in Indonesia in the late 1980s as a reaction to the environmental and social consequences of the Green Revolution model of agriculture. This study assesses the extent to which Community IPM has been institutionalised in Java (Indonesia).

8. Gatekeepers Series

Issue 112 – The Major Importance of ‘Minor’ Resources: Women and plant biodiversity.

Patricia Howard

Only available on subscription but back copies are downloadable from our [website](#).

Understanding women’s influence on plant biodiversity is essential to our ability to conserve plant genetic resources, especially those plants that are useful to humans.
