mining minerals
and
sustainable development

**Strategic Planning Workshop
and First Assurance Group
Meeting**

hosted by
iied

Question

**What products can this process
usefully produce?**

Report

- * May be a constellation of objects, not just a document
- * Due end of 2001
- * Presentation process to be designed
- * What is the best form for this report?

Research

- * Stronger regional research capabilities
- * Thorough survey of available information (possible series of CDs)
- * Agenda for future research (global and regional)

Engagement

- * Principles of engagement suitable for general application
- * 3-4 global dialogues on key issues
- * Platforms for engagement at regional level

Follow-up

- * Implementation process
- * Action agenda (global and regional)
- * Support for other elements of the GMI project

Implementation background

- * Many research / dialogue processes have been tried before
- * Important conclusions have been reached but the long term impact is sometimes questionable
- * Implementation of the conclusions must be a consideration from the outset

Implementation

- * This is a sensitive issue
- * We are committed to working with all interested parties
- * MMSD is committed to developing process for implementation up front
- * Implementation may not just involve companies but also government and NGOs

Development of Implementation Process

- * June-Aug. Commission 4-5 experts to develop concepts as to what implementation process could look like
- * Seek diversity of views
- * Aug.-Sept. Present ideas in small workshops
- * Nov.-Dec. Present alternatives to broader balanced audiences
- * Jan.2000 ?? Reach decisions as to future course
