

# Objective

- What are the economic costs of climate change to tourism on Tobago?
  - Identify the economy
  - Differentiate the economy by tourism product
  - Identify climate impacts
  - **Identify climate impacts on differentiated product**

<b>SEGMENTS</b>	<b>DATA on SIZE, SCALE, etc.</b>	<b>DIFFERENTIATION by cost or location or season or other?</b>	<b>CHANGES EXPECTED DUE TO CLIMATE CHANGE</b>
<b>Shore-based accommodation (Hotel, Villa, guesthouse)</b>			
<b>Offshore accommodation (cruise ships, yachts)</b>			
<b>Long-stay visitors</b>			
<b>Reef-related activities (diving, snorkeling, game-fishing)</b>			
<b>Other nature-based activities (bird and turtle watching, hiking, biking, surfing)</b>			
<b>“All-reclusive” holidays</b>			
<b>Cultural, heritage and community- based activities</b>			
<b>Food and beverage services</b>			
<b>Entertainment</b>			

# Group work

- Do these differentiations make sense?
- What data exist on the size, scale, turnover of each sector?
- Can each sector be usefully further differentiated?
- What are the expected changes under expected climate change to each segment?
