The purpose of the CBA economics session is to use the perspectives and experiences from a wide range of fields and locations to throw wide the uses and approaches of economics and how it can be used as a practical tool to enhance community based adaptation and policy development. The session will cover the themes of CBA as a learning process rather than an event, scalability of approaches, information/data and the role of the private sector. Case studies and perspectives from Asia, Africa and the Pacific as well as observations from field visits will be used to stimulate an interactive session, helping participants realise that they are also economists. The session will not depend on complex economic presentations, but on the knowledge and experiences of</p>

		<p>participants. Khumbo Kamanga, John Nyangena, James Harcastle, K.A.L. Nushela and Atiq Rahman/Golam Rabbani will make short presentations covering community activities, natural resources and policy to stimulate our economic thinking and discussions.
