Environment and
Development

Participatory Learning and Action is the world's leading informal journal on participatory approaches and methods. It draws on the expertise of guest editors to provide up-to-the minute accounts of the development and use of participatory methods in specific fields. Since its first issue in 1987, *Participatory Learning and Action* has provided a forum for those engaged in participatory work – community workers, activists, and researchers – to share their experiences, conceptual reflections and methodological innovations with others, providing a genuine 'voice from the field'. It is a vital resource for those working to enhance the participation of ordinary people in local, regional, national, and international decision-making, in both South and North.
