

Report on photo transect along road through Bi Doup-Nui Ba National Park

Date of transect: March 28th, 2010

Who carried out the transect: Nhan

General observations:

This photo transect is recorded for changes along Road 723 in whole dry season. Generally, there has been a little changes within area where we did the survey. It is concluded that forest management is better in last 6 month. What will happen when rainy season coming?

Map to show locations of transect points:

Comparison of transect photographs with previous transect from date: April 22nd ,2008

1) GPS Location: Lat: 12.02628 Long: 1084966

Commune: Dasar

Village: 1

Previous transect: April, 22nd 2008

Previous transect: October, 27th 2009

Observations: Road construction has been finished, old road is served for product transport in farm

Current transect: March , 28th 2010

2) GPS Location: Lat: 12.04374 Long: 108.4890

Commune: Dasar Village: 1

Previous transect: April, 22nd 2008

Previous transect: October, 27th 2009

Observations: No more encroachment, farm has been tending for new season.

Current transect: March , 28th 2010

3) GPS Location: Lat: 12.04374 Long: 108.4890

Commune: Dasar Village:1

Previous transect: April, 22nd 2008

Current transect: October, 27th 2009

Observations: Trees, small house was removed , what is land owner's plan?

Current transect: March , 28th 2010

4) GPS Location: Lat: 12.07595 Long: 108.5231

Commune: Dasar Village: 6

Previous transect: April, 22nd 2008

Previous transect: October, 27th 2009

Observations: Sand exploitation from river, now it is used for new road upgrading

Current transect: March, 28th 2010

5) GPS Location: Lat: 12.12113 Long: 108.5866

Commune: Danhim

Village: Dongmang

Previous transect: April, 22nd 2008

Previous transect: October, 27th 2009

Observations: One more new house is being built in Thien Thai Company,

Current transect: March, 28th 2010

6) GPS Location: Lat: 12.12113 Long: 108.5866
